JESSE & FRICHTEL TAPS MDT THOMAS HEUPEL AS GM OF LAB OPERATIONS

Pittsburgh, Penn. — Jesse & Frichtel Dental Labs boast a new General Manager of Lab Operations, H. Thomas Heupel, MDT. Heupel joins Jesse & Frichtel from Custom Milling Center where he was the production manager.

Heupel's extensive background in restorative dentistry across two continents will deepen Jesse & Frichtel's already expert technical team, which is known for its ability to handle the most difficult implant cases.

"We're extremely excited to have Thomas join our organization," said Mark Frichtel, President and CEO of Jesse & Frichtel. "With his proprietary technique for design and fabrication of screw-retained hybrid zirconia bridges, his restorations are truly incomparable and Heupel will serve as a huge asset as we expand our full zirconia hybrid bridge offerings."

As General Manager of Lab Operations, Heupel will train staff, oversee cases and fabricate restorations within the Jesse & Frichtel Lab.

Heupel earned a bachelor's degree in dental technology and business administration from the Master School of Dental Technology in Ronneburg, Germany. Before arriving at Jesse & Frichtel, he worked as a technician and operations manager for major laboratories in Germany, Canada, Boston and Los Angeles. His first day was Monday, January 9.
